DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 27-30 and 42 are rejected under 35 U.S.C. 102(e) as being anticipated by Crawford et al., U.S. 6,702,011.

Regarding claims 1-4 and 27, Crawford et al. discloses a coil tubing injector system (44), a nitrogen system and heat exchanger (38,40) heated by the engine radiator fluid (col. 2, lines 52-54), a platform (10,30) propelled by the engine (70).

Regarding claim 28-30 and 42, Crawford et al. discloses a spool (50), tubing (130), the injector system (44), a guide (52) a heating unit (40) heated by the engine radiator or reservoir fluid (col. 2, lines 52-54), the engine inherently having a water pump to supply a hot water line (72), a liquefied nitrogen pump (64) all supported on a single platform (30).

Allowable Subject Matter

Claims 5-26 and 31-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

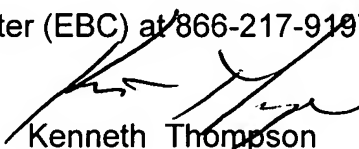

Curtis, U.S. 2003/0085036 discloses a similar offshore system.
